Instructions for Use

1. Insert the reusable handle containing batteries, if new/reusable candles batteries were needed, a single use sterile tip and plastic sheath are packaged together and are to be opened just prior to use.

2. Open the sterile package containing the sheath and tip.

3. Hold the sterile needle with the opening upfield. Insert the handle into the sheath with the front oriented to the bottom of the sterile sheath. Seal the sterile sheath - during this procedure, the sheath should be encased to maintain the sterility of the sheath.

4. The single use sterile handle contains batteries, if needed.

5. The needle is now inserted into the cone of the handle, piercing the sheath and disposed lightly.

6. After use, remove the used tip and sheath, and dispose of them, replace batteries if necesary (or replace).

7. The needle is now ready for use and is activated by depressing the button with the thumb of the hand.

8. The reusable handle is now inserted into the cone of the handle, piercing the sheath and disposed lightly.

9. Hold the needle with the opening upfield. Insert the handle into the sheath with the front oriented to the bottom of the sterile sheath. Seal the sterile sheath - during this procedure, the sheath should be encased to maintain the sterility of the sheath.

10. The needle is now ready for use and is activated by depressing the button with the thumb of the hand.

IMPORTANT NOTE: A handle with reusable canned batteries are supplied by a distributor/manufacturer of medical devices. If problems occur, please contact your distributor for replacement of batteries. Batteries from other sources may cause the cautery handle to fail.

The reusable handle is powered by "AA" batteries. Replacement batteries should only be purchased from your distributor.

The cautery handle is powered by "AA" batteries. Replacement batteries should only be purchased from your distributor.
